4

REASONS TO GET STARTED WITH ENVIROLASKA

- Simplistic software that anyone can use.
- Unlimited views per course.
- Simple to use platform that allows for easy viewing of courses, management of users and creation of accounts.
- View and file reports for all locations within your organizations.

SPECIAL FEATURES

SAFETY PLANS

You can easily create and manage safety plans and incident reports. **No more searching the web to find templates** for creating safety plans or reporting incidents.

Safety plans include Exposure Control, Injury & Illness Prevention, Fire Safety, and more. Incident reporting includes reports for needle sticks, sexual harassment, HIPAA breaches & more.

SDS LIBRARY

Time to throw away the big bulky binder on the shelf with all the SDS sheets. Envirolaska' proprietary database of SDS sheets allows for offices to search millions of SDS sheets and save them to a library for easy access.

These sheets are also saved under each learner / employee account in case there is a need to have access to safety data sheets while an administrator is not in the office.
